

**Incident Management Situation Report
Thursday, June 29, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (119 fires)
New large incidents:	4
Large fires contained:	0
Uncontained large fires: **	8
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	2

Nationally, there are six fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

Geographic Area Reports

Understanding the IMSR

Six incident management teams, 18 fire suppression crews, 40 smokejumpers and 15 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Southwest Area (PL 3)

Fire Activity and Teams Assigned	Total
New fires:	16
New large incidents:	2
Uncontained large fires:	4

* **Diamond**, Central District, Arizona DOF. One mile east of Scottsdale, AZ. Grass and brush. Active fire behavior with wind-driven runs and spotting. Numerous structures threatened. Evacuations and trail closures in effect.

* **Sunset North**, Captain District, New Mexico State Forestry. Thirty miles west of Roswell, NM. Grass and brush. Moderate fire behavior. Structures threatened.

West Hemp, Coronado NF, USFS. Started on DOD land eight miles west of Sierra Vista, AZ. Grass and brush. Minimal fire behavior with smoldering. Area and road closures in effect.

Rico, Las Cruces Field Office, BLM. One mile north of Pinos Altos, NM. Light slash and timber. No new information.

Fires (2013 – 2022 as of today)	26,483
Acres (2013 – 2022 as of today)	1,838,359

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

An upper level ridge is centered over the ArkLaTex area where well above normal temperatures will result, with strong southerly winds expected over west Texas and into the plains of Oklahoma and the Mississippi Valley. Minimum relative humidity of 10 – 20 % is also expected in west Texas and much of the Southwest, where a chance for isolated dry thunderstorms exists. Strong southwest winds are also likely across the Southwest and greater Four Corners area, where warm, dry conditions will prevail before a frontal passage will likely occur later in the day, shifting winds to a more northeasterly direction. Isolated to scattered thunderstorm activity is likely over the mountains of Utah and western Wyoming and central Idaho as well as east of the Continental Divide in the Rocky Mountain Region, much of the Great Lakes, and far Northeast with severe thunderstorm development possible over much of the central High Plains and into the Mid-Mississippi Valley. Smoke from Canadian wildfires will impact air quality in the Great Lakes area, spreading into the Southeast.

In the western US, another high pressure ridge will begin to build driving temperatures above normal in the Pacific Northwest and much of California and initiating a warming trend over the Great Basin. Alaska continues to have wet, cool conditions and with an outbreak of wet thunderstorms forecast across the Interior.
